

2nd LL TERRAIN meeting with stakeholders
July 3, 2025
Regional Development Agency South Banat, Pančevo

On July 3, 2025, the second stakeholder meeting was held in Pančevo within the framework of the project **Twinning and Engagement in net-zero tRanport tRAnslItioN – TERRAIN**, which is funded under the INTERREG IPA ADRION Programme. Regional Development Agency South Banat Ltd. Pančevo is one of the project partners, while City of Pančevo participates as an associated partner.

During this stakeholder meeting, the project's activities to date were presented, along with the expected benefits the City of Pančevo will gain from its implementation.

The main objective of the meeting was to jointly define strategic goals in the field of sustainable mobility in Pančevo and to establish priorities. It was concluded that improving cycling infrastructure and providing public garages/additional parking spaces—especially around pedestrian zones and public transport bus stops—are key to developing multimodal transport and reducing the use of private vehicles.

The Regional Development Agency also informed participants about the progress of the pilot activity involving the installation of solar panels on five city public transport buses, aimed at reducing diesel consumption and, consequently, harmful exhaust emissions.

The meeting was attended by representatives of the public transport company “Pantransport” Pančevo, the City Administration of Pančevo, the Public Enterprise “Urbanism”, the Institute of Public Health Pančevo, as well as several civil society organizations focused on environmental protection and transportation.

The implementation of the project began on September 2, 2024, and is scheduled to last for 36 months.

All information and news about the project are available at: <https://terrain.interreg-ipa-adrion.eu/>

U Pančevu je 3. jula 2025. godine održan drugi sastanak stejkholdera u okviru projekta Twinning and Engagement in net-zero tRanport tRAnsItioN – TERRAIN, koji je odobren za finansiranje u okviru INTERREG IPA ADRION programa u kome je Regionalna razvojna agencija Južni Banat doo Pančevo jedan od partnera, a Grad Pančevo je pridruženi partner.

Na ovom sastanku sa stejkholderima, odnosno - zainteresovanim stranama, predstavljeni su dosadašnje aktivnosti u okviru projekta i korist koju će od realizacije projekta imati grad Pančevo.

Glavni cilj sastanka je bilo zajedničko definisanje strateških ciljeva u oblasti održive mobilnosti u Pančevu i određivanje prioriteta. Zaključeno je da su unapređenje biciklističke infrastrukture i obezbeđenje javnih garaža/dodatnih parking površina (pogotovo oko pešačkih zona i stajališta autobusa u javnom prevozu) ključni za razvoj multimodalnog saobraćaja i manje upotrebe privatnih vozila.

Takođe, RRA je upoznala prisutne sa napretkom pilot aktivnosti, tj. postavljanjem solarnih panela na pet autobusa gradskog javnog prevoza u cilju smanjenja potrošnje dizel goriva, a time i smanjenja štetnih izduvnih gasova.

Sastanku su prisustvovali predstavnici preduzeća za javni prevoz putnika “Pantransport” Pančevo, predstavnici Gradske uprave Pančevo, JP “Urbanizam”, Zavoda za javno zdravlje Pančevo kao i predstavnici nekoliko udruženja građana u čijem fokusu rada su ekologija i saobraćaj.

Implementacija ovog projekta počela je 2. septembra 2024. godine, a predviđeno je da traje 36 meseci.
